A platform where people can compare hospitals to get the best care they need.

A hospital comparison web app which compares treatments at different hospitals and gives real user feedback. This helps people by telling them about the best hospitals for their illness so that they get the best treatment for their disease.

Main Features

Geo-Location

We will take the users geo-location and list the hospitals accordingly.

Advance Seacrch

One stop solution for all. A user enters the search term and gets results sorted accordingly

Comparison

The hospitals with better and more positive user feedback will get sorted above the others.
